

Works – A508, Maidwell

Start date – 27/01/2020

Completion – 20/03/2020

Scheme type – Drainage

Traffic management – Traffic lights (24/7)

Hours of work – Monday to Friday 07:30 – 17:00

What we are doing – This scheme aims to improve the surface water drainage along the A508 in Maidwell. To achieve this we will install a new carrier drain throughout the worst affected area of the village and install approx. 10 new gullies. We will also aim to repair or replace existing pipe runs to improve the capacity and functionality.

When programming works, we consider the impact on all network users and plan our works to minimise disruption as much as possible. During works, there will be traffic lights in place 24/7 to ensure the safety of the public and our workforce. We do understand that this will be inconvenient but works can only be completed safely and efficiently with this in place. Also look out for the advanced notice boards which will be out two weeks before the planned works detailing the dates of the works.

We will endeavour to maintain access to all properties and businesses at all times, however there will be times when we have to excavate across entrances to install the new pipework which will restrict access short term. Please liaise with the site team or site management for information regarding any issues.

The estimated programme of works is eight weeks. However this is weather dependent and may be subject to change. Please refrain from parking in the affected areas, your cooperation is appreciated.

Information for residents and businesses

Access: The traffic management will be in place 24/7. Access/egress will be maintained to all properties however there may be some delays. Please allow extra time for your journeys.

Start date: 27/01/2020 – 20/03/2020

Pedestrians: During the works, barriers will be in place to ensure safe passage of pedestrians.
